Approach Procedures

No Instrument procedure available.
Visual approach and departure with circling overhead the airport both on approach and departure required to avoid possible small arms fire.
Obstacle of 260 feet AGL at 4 NM Radial 115 Erbil NW

Security and General Situation Status

No security measures at the airport.
The airport is situated 3 km from the UN-office; it is only open for aircraft up to C-130.
The runway is in bad condition as well with the grass growing through the shoulders up to 1,5 mtr. The shoulders will not be able to support medium weight aircraft.
The runway surface has been repaired and the total length is available. There is no taxi way available so aircraft has to back-tract for departure. Old RW 15L and 33R is un-usable and currently used as helipad.
