28th of March 2008

To the
NGO & UN Agency Community
Nyala, South Darfur

Dear All,

The German Federal Agency for Technical Relief (THW) is planning to set up and operate a vehicle/generator repair and maintenance workshop in Nyale beginning of May 2008 based on the experience made at the workshop in Al Fasher, North Darfur, during the past 3 ½ years.

We offer our workshop and other technical services to UN Agencies/NGO's/GO's

We are able to repair and maintain vehicles, carry out installation and repair of generators and diesel pumps, do assist in electrical wiring in buildings to the international norm and standard, install HF & VHF Radios, small scale water installation projects etc., although the responsibility of providing required information, material, spare parts, filters, oil, etc., will rest with the Agency/NGO/GO.

A mobile service is also available in situations where it isn't possible to get machines / equipment to our workshop.

We do vocational training for national mechanics and electricians on request.

Working hours will be: Sunday to Thursday (09:00 until 16.00)

Best Regards

Juergen Maresch
HoM, THW Darfur
